

GLBA compliant faxing that works.

Rest easy. Sfax meets or exceeds all of the rigors of GLBA compliance.

In today's connected world of financial services, you're right to be concerned about GLBA compliance. We have been safeguarding sensitive information every day since 1998 to ensure the confidentiality and integrity of the information being processed.

Security & protection are in our DNA

/// Gramm-Leach Bliley Act

The Gramm-Leach-Bliley Act provides regulations to protect consumers' personal financial information held by financial institutions. The Financial Privacy Rule addressed the collection and disclosure of customers' personal financial information by financial institutions and also applies to companies who receive such information.

Sfax safeguards all personal financial information transferred to and from financial institutions while using our products and services.

Sfax has implemented physical, organizational and technical safeguards necessary to protect the confidentiality and integrity of the information being processed.

/// Safeguards

Sfax has plethora of physical, organizational and the technical measures to protect the confidentiality and integrity of information processed by our products and services. Our safeguards, combined with our smart technology means that we deliver the highest levels of security in relation to digitizing, processing and storing sensitive information.

/// Sfax faxing tips

Sfax provides products and services to help ensure that sensitive information is protected throughout the entire document lifecycle.

- **Assess the recipient's security infrastructure.** Always ensure that
- the receiver has taken appropriate precautions to prevent anyone else from accessing the electronic or paper-based faxed documents.
- **Confirm the recipient's fax number.** Before sending a fax, check that the receiver's number is correct.
- **Include a cover sheet.** Always complete a fax cover sheet that clearly identifies both the sender and the intended recipient. The cover sheet should include a standard confidentiality notice stating that the information contained in the fax is legally privileged, that the fax is intended for the named recipient only a request to contact you directly if the transmission was sent in error.

/// Get faxing compliance
